

PREDICTABLE DENTISTRY | IN THE AGE OF INNOVATION

SYDNEY

Saturday 24th November

7.5 HOURS OF CPD POINTS

Presented by
Dr. Michael Miyasaki

MELBOURNE

Sunday 25th November

Dr Michael Miyasaki formerly of The Las Vegas Institute (LVI) and current director of Education for Pacific Aesthetic Continuum (PAC), invites you to attend his full day seminar in November 2018.

As a practising clinician and vastly experienced educator, Dr Miyasaki will guide you through everyday clinical challenges. Current materials, Advanced concepts & trending technology will be discussed and the advantages of implementing this technology.

“In the States aesthetics has been growing again. Occlusion interest is also on the rise due to the importance it brings to larger cases and implants.

We will be covering a broad range of skills :

The one thing that needs to be in every examination.
How to perform restorations with no anaesthetic.
The ten things you need to know to place posterior restorations in less time that will last longer. Why you should consider a laser to make you life easier.
The principles you should follow to plan the larger cases that your patients will love and which will make you want to practice forever.” Dr. Miyasaki

Dr Miyasaki will show you how to plan patient care to provide a lifetime of dental health. Learn how to provide affordable and long lasting dentistry, from planning to materials.

WIDE RANGE OF TOPICS TO BE DISCUSSED:

Technology, techniques, and materials

- Techniques to improve bond strengths
- Easier & Faster Class II restorations using unique materials
- Avoiding recurrent decay around interproximal restorations
- Achieving proper interproximal contacts using Matrix systems
- The Reasons for sensitivity & the solutions available

Advantages of different systems and techniques available

CLASS II RESTORATION CASE STUDY BY DR MIYASAKI

Preoperative photo of DO amalgam on tooth No. 4

Selective-etching on the enamel, with Sure Etch, for 15 seconds

Scrubbing Prelude One into the preparation, which is then dried with air and cured

Filling Bulk EZ from the bottom of the preparation and then coming up and across the preparation makes for quick placement

Carving the anatomy into the Bulk EZ as it sets

Immediate postoperative appearance
