ADVANCED ADHESION DENTISTRY:

**New Technologies & Techniques that
solve Clinical Issues**

**Presented by Prof
Troy Schmedding**

**7½
CPD
POINTS**

**EARLY BIRD
ONLY \$229**

**ADDITIONAL
STAFF \$179**

**FULL DAY
Seminar**

PROFESSOR TROY SCHMEDDING, DDS, AACD

Dr. Troy Schmedding has been a practicing cosmetic and restorative dentistry for the last 20 years. He is a 1993 honours graduate from The University of the Pacific: Arthur A. Dugoni School of Dentistry. In addition to maintaining a private practice in Walnut Creek, California, Dr. Schmedding is Assistant Professor in the Department of Integrated Reconstructive Dental Sciences at The University of the Pacific, Arthur A. Dugoni School of Dentistry.

Dr. Schmedding is one of 450 dentists to achieve accreditation status in the AACD. He speaks and teaches internationally on both aesthetic and restorative dentistry.

TOPICS COVERED:

- What's new with Bonding Agents?
- Treating deep carious lesions with predictability
- Are desensitisers a must in dentistry today?
- Grasping all the composites on the market today
- Impression techniques to ensure quality
- Techniques for tissue management
- Do you see what I see? Dental magnification is a must!
- Predictable intra-oral repairs
- Can we really bond to Zirconia ?
- Porcelain / Zirconium - Today's ceramics of choice
- Demystifying cementation protocols for all ceramic restorations
- The under-utilised process of micro-etching
- Bulk Fill products we should all be using in our practices
- Oral Cancer screening — Are we doing our part ?
- Proper removal and adjustment of indirect restorations

COURSE OBJECTIVES:

- How to properly treat and chemically bond to zirconia (**Yes You Can Bond To Zirconia!**)
- Understand management of cracked tooth syndrome
- Learn the critical issue with single-bottle adhesives
- Discover how to virtually eliminate post-operative sensitivity
- Advantages in Universal Composites
- Decision making strategies in ceramic restoratives
- Bonding protocols for each technique to ensure long term success
- Use of Air Abrasion in Adhesive Dentistry
- The best choice for adhesion in today's ceramics
- Optimal Aesthetics with little or no preparation
- Demystify the selection process for the best bonding/ adhesive strategies

Adhesive Dentistry: Science behind the Results:

"In the last 25 years, there have been major advancements in material science, research and techniques, however, many of these advancements have not been implemented in the majority of dental practices."

This course will present advanced techniques and materials (backed by published scientific articles) that will **virtually solve every problem with direct composite & indirect ceramic restorations**. A review of some of the popular trends in restorative dentistry that can negatively affect patient satisfaction and referrals will also be discussed.

New Advances in Restorative Materials:

Today, dentists are faced with many challenges when implementing adhesive dentistry into their day to day direct and indirect restorations. We will discuss the most recent information on bonding agents as well as predictable Bulk Fill materials.

Cementation (bonding) protocols of non-metal based indirect restorations will be discussed. Breaking down the confusion that lies between silica based ceramics and non-silica based ceramics when deciding which cementation protocol to implement.

Predictable Restorations from Preparations to Impression, Temporisation to Cementation:

One of the most profitable procedures performed in a dental office on a daily basis is **the indirect restoration**, but if not performed well can be the most costly. Fine detail must be placed into all aspects.

Understanding preparation design in regards to final material choice as well as tissue management and provisionals are critical aspects. Finally understanding the most beneficial cementation protocol to enhance the longevity of your restoration.

EARLY BIRD SPECIAL \$229 / ADDITIONAL STAFF \$179

Brisbane: Fri 18th Oct
Hotel Grand Chancellor, 23 Leichhardt Street, Spring Hill

Perth: Sun 20th Oct
Pan Pacific, 207 Adelaide Terrace, Perth

Melbourne: Fri 25th Oct
Bayview Eden, 6 Queens Road, Melbourne

Sydney: Sat 26th Oct
Mercure Sydney, 818 – 820 George Street, Sydney

Seminar starts at 9am-5.30pm
Morning tea, lunch & afternoon tea will be provided
